

SPS 3Sixty has been designed by a team of experts from the plastic and rubber industry with help and assistance from SPS personnel who have over ten years experience in reflective bollard technology.

**Winning Design,
Outstanding
Performance,
Amazing Price.**

Internally moulded struts ensure that the bollard shell does not compress which means no cracking or creasing of the rigid reflective material.

- Reinforced body shell to support reflective panels/sign face
- Robust low profile rubber base with moulded in steel base plate
- No springs or mechanical parts
- All graphics recessed with side reflectors angled for additional conspicuity
- Rear reflector panels at no extra cost
- Will fit directly on to the majority of current reflective bollard footprints
