Watchman Barrier

Watchman is the most complete Chapter 8 barrier system available to the industry. Barrier posts, manufactured in HDPE, provide a strong and durable upright, and are square for easy storage.

Recycled heavy duty square bases are stackable, and can be embossed or coloured for easy identification. Bases fit over the uprights to ensure the system cannot be easily dismantled when unattended.

Planks are manufactured from High Impact PVC, HDPE Polytuff by special order. Available with fully reflective facing, in lengths from 1.25, 2 and 3 meters, planks can also be screen printed for corporate identity. Watchman planks are fitted with end connectors incorporating a unique locking feature. End connectors have different setting to accommodate uneven surfaces. End connectors can also be supplied separately for use with existing barrier planks.

Lamps can be fitted to uprights, and sit inside the post for added protection.
